

Creator Bio — Ciprian Stefan Plesca

Ciprian Stefan Plesca is the creator of *VESUVIO: Blood of Naples*, an original modern mafia television series concept set in Naples, Italy. Plesca developed the project's complete creative package independently — story concept, world-building, character bible, episode structure, pilot script, and an original Neapolitan-dialect theme song — with the aim of bringing an authentic, culturally specific crime saga to a global audience.

VESUVIO: Blood of Naples reflects Plesca's interest in stories where setting, language, and culture are inseparable from plot: a series that could only take place in Naples, told the way only Naples would tell it.
